

Avast[®] Business Antivirus for Mac[®]

The fastest protection powered by the world's largest threat detection network

THE BIG BENEFITS

Protecting critical business and customer data against the latest threats while you stay focused on your business.

Machine-learning protection

Threats are constantly evolving and thanks to Avast's machine learning and the world's largest threat detection network our protection is constantly evolving, detecting new threats quickly and keeping you safe.

Always up to date

We stream automatic micro-updates to keep you protected without slowing you down.

Wifi Inspector

Scans your environment for vulnerable devices and compromising services with step-by-step remediation to keep you safe.

SmartScan

A collection of browser plug-ins that keep you and your data safe while online.

PROTECTION

Today's threats are ever-changing. Your protection needs to be both broad in coverage and deep in capability. Only Avast has the advantage of the world's largest threat detection network powered by over 400 million endpoints.

ANTIVIRUS

Avast antivirus combines three real-time shields; File Shield, Web Shield, and Email Shield to offer comprehensive protection against today's threats.

- **FILE SHIELD**

Stops threats and keep your business moving. File shield quickly scans files that are launched on a PC to ensure they're free of malware.

- **WEB SHIELD**

Web Shield scans both HTTP and HTTPS sites for

malware and other dangers, even verifying website certificates, without disrupting the users' browsing experience.

- **EMAIL SHIELD**

Free your workforce to surf, search and email with confidence. Email Shield scans emails in your inbox to ensure they're free of malware.

WIFI INSPECTOR

Scans networks for vulnerable devices and compromising services then allows you to address any security issues reported by providing step-by-step remediation instructions.

AVAST ONLINE SECURITY

Avast Online Security features a number of browser plug-ins. Do Not Track identifies tracking software and users can enable, disable or choose to create a selectively private online browsing experience.

Each of our browser plug-ins also include an Anti-phishing feature that blocks web pages from loading if Avast detects malicious sites. The SiteCorrect function corrects typos in URLs to prevent you from accidentally going to websites you didn't intend to visit.

This solution may be used standalone or centrally managed by either an on-premise or cloud-based management console. Both consoles offer ease of deployment, management and reporting.

ABOUT AVAST BUSINESS

The Avast Business Endpoint Protection solutions provide solutions to secure, simplify and optimize the IT experience for small and medium-sized businesses worldwide. As a business unit of Avast Software, channel partners and their end customers gain the confidence of working with a company that is uniquely positioned in the security and managed services market.

Serving over 400 million people and businesses, each device Avast protects and secures acts as a sensor, providing us unparalleled insight into what is happening real-time in our users' world through their connected technologies. Our threat detection network is among the most advanced in the world, using machine learning and artificial intelligence technologies to detect and stop threats in real time. This gives us unprecedented insight into the life cycle of cyber security attacks, malware, phishing, ransomware and data breaches to deliver the

most comprehensive protection against cybercrime to date while delivering products that are easy to purchase, onboard and implement with high-performance.

Avast Business Endpoint Protection solutions may be managed from the cloud or from an on-premise solution and includes a security remote monitoring and management platform which helps SMBs secure their network.

Avast Business is dedicated to the channel and has a comprehensive partner program in place to support partners with tools and knowledge to successfully position and sell the Avast Business products, effectively secure SMBs, and enable profitable channel growth. Partners can access cloud and hosted services for their end customers. On-premise business security solutions can also be purchased online directly by SMBs.
