

Allot Products & Solutions

Drive the Digital Experience

Allot Communications is a leading provider of security and monetization solutions designed to protect and personalize the digital experience that your network delivers every day. Allot solutions are based on a highly scalable service delivery framework that enables you to leverage the traffic intelligence in your network so you can get closer to your customers, safeguard them from online threats, and accelerate time-to-revenue for value-added services.

Allot blends innovative technology, industry know-how, and a collaborative approach to assure that you get the solution that is right for your network environment and your business. Allot products and solutions are backed by a global support organization and expert professional services that deliver tangible results and create real value for our customers.

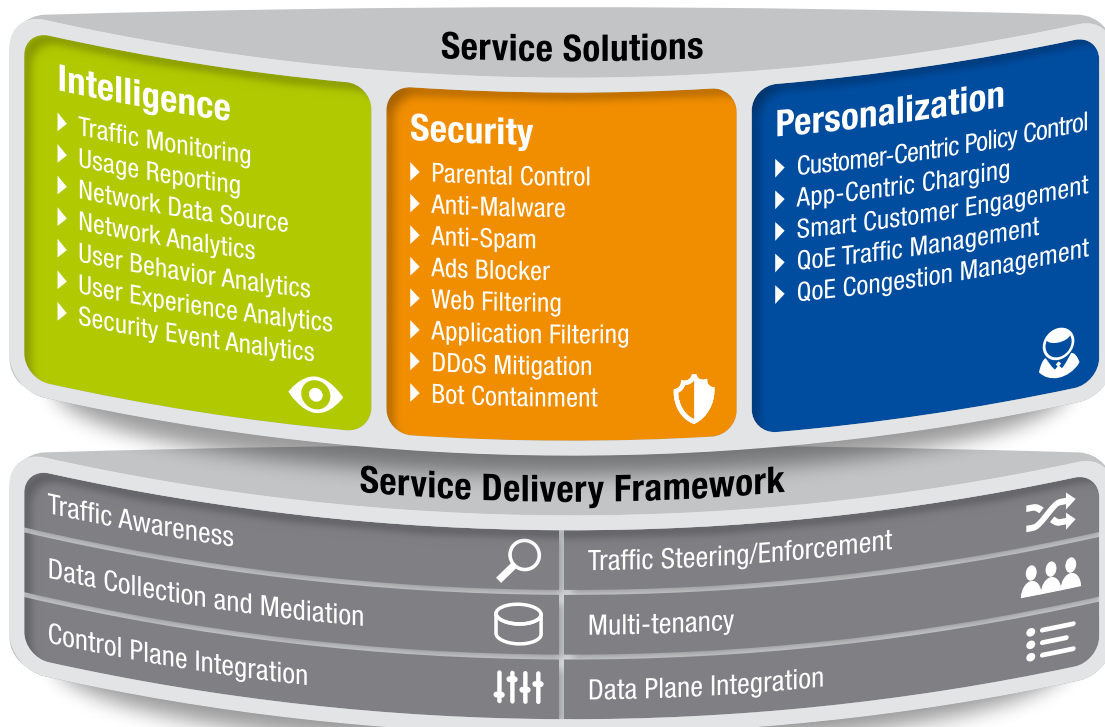

Security and Monetization Solutions

Monetizing Network Usage

Allot security and monetization solutions comprise a growing portfolio of digital lifestyle services powered by a scalable service delivery framework that integrates easily in any network environment. Our focus on service intelligence, security and personalization helps you monetize network usage through targeted customer engagement and value-added services that enhance the digital experience of every customer.

Scalable Service Delivery Framework

In traditional networks, Allot Service Gateway inline platforms provide a single point of integration for the deployment of services ranging from visibility, control and security to customer engagement and monetization. Allot Service Gateway Virtual Edition plays the same role in NFV environments, providing a virtualized service delivery framework for seamless deployment, integration and interoperability of virtualized network functions (VNF).

High-Performance Service Delivery Platforms

Allot Service Gateway platforms enable flexible deployment and efficient delivery of digital lifestyle services over both traditional and virtualized network infrastructure. With 100GE and 10GE connectivity and throughput that scales to terabits-per-second, these carrier-class platforms help you satisfy the growing demand for safe, personal, and affordable Internet services. Allot offers a growing portfolio of pre-integrated services as well as real-time traffic steering to virtualized services in the cloud.

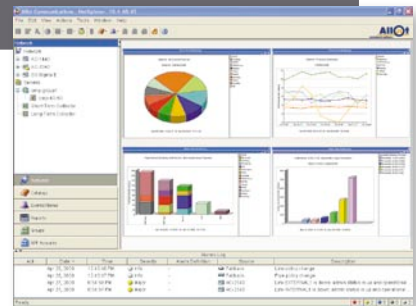

With speeds ranging from 20 Mbps to 16 Gbps, **Allot NetEnforcer** platforms are purpose-built to provide the visibility, control and service integration that is needed to ensure application performance and user quality of experience across enterprise, cloud, and service provider networks.

Unified Management

As the scalable management system for Allot platforms, and services, **Allot NetXplorer** provides a central vantage point for network-wide configuration, policy management, and traffic monitoring.

NetXplorer Reporter provides real-time reports with 30-second accuracy for fast troubleshooting and resolution of customer care cases.

NetPolicy Provisioner provides a self-management interface for your VPN and managed services customers.

Product Portfolio

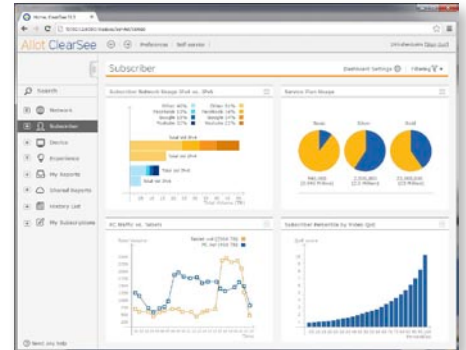

Intelligence

Smart Network Data

As the leader in traffic visibility and classification, Allot helps you extract and leverage granular usage data from your own network so you can make data-driven business decisions that create new opportunity for customer engagement and service monetization. From **Streaming Data Records** to **Smart Data Source**, Allot Data Science professionals save you time and money by curating exported data to the needs of your use case, BI system, big data or regulatory project.

Insightful Network Analytics

Allot ClearSee Network Analytics turns network usage data into business intelligence and meaningful information for the decision-makers in your organization. Allot gives you a rich array of out-of-the-box metrics and dashboards plus the same powerful tools that Allot Data Science professionals use to gain deeper insight.

Security

Protecting Users

Allot **WebSafe Personal**, **WebSafe Business**, and **WebSafe Enterprise** products safeguard your customers by providing Security as a Service from your network cloud. Allot integrates anti-malware, parental controls, URL filtering, mail security, ads blocking, and application control into a scalable, multi-tenant platform that simplifies service rollout and accelerates time-to-revenue.

Protecting Network Infrastructure

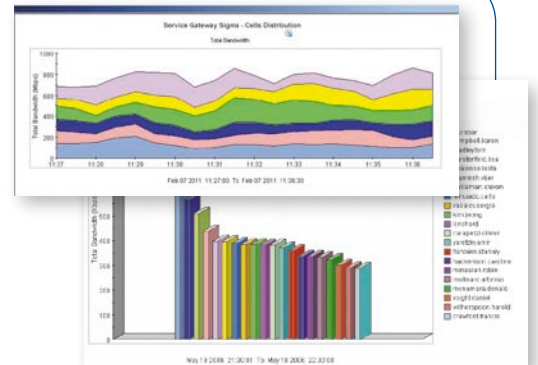

Allot ServiceProtector and **SpamOut Protector** detect and surgically mitigate inbound and outbound cyber threats including DDoS and Zero Day attacks, IP scanning, and spambots, before they impact service availability and business continuity, while **Allot ContentProtector** blocks access to blacklisted and illegal content, enabling full regulatory compliance without affecting network performance.

Personalization

Drive the Digital Experience

Allot **Subscriber Management Platform (SMP)** employs standard 3GPP interfaces to enable the flexible provisioning, enforcement, and charging of value-added services that are the key to differentiating your offering and maximizing revenues. Allot **TierManager**, **Quota Manager** and **ChargeSmart** help you personalize service plans, enforce usage caps and overage policy, and manage real-time metering of usage-based and application-centric charging models.

Allot Professional Services apply the know-how and experience we have gained by working with service providers and enterprises worldwide to assure the success of every solution deployment.

Please refer to the relevant Allot product datasheets on our website for a full description of the features and functions of each product, or get a personal briefing by contacting sales@allot.com

Product	Description	Form Factor
Intelligence		
Streaming Data Records	CDR, XDR mediation and export	Software licenses + HW
Smart Data Source	CDR, XDR mediation, aggregation and export	Software licenses + HW
ClearSee Network Analytics	Network Analytics and BI system	Software license + HW
ClearSee Network Metrics	Out-of-the Box reporting and analytics	Free Software license + HW
ClearSee Real-Time View	Real-time network usage metrics	Software license (add-on)
Data Science Services	Customization, integration, analytics	Professional services
Security		
WebSafe Personal	Security as a Service for consumers	SECaaS license (optional HW)
WebSafe Business	Security as a Service for SMB, SOHO	SECaaS license (optional HW)
WebSafe Enterprise	Security as a Service for enterprise	SECaaS license (optional HW)
ServiceProtector	DDoS and cyber threat mitigation	Software license (optional HW)
ContentProtector	Regulatory blacklist URL filtering	Software license (optional HW)
SpamOut Protector	Outbound spam mitigation	Software license (optional HW)
Personalization		
SMP TierManager	Subscriber tiered services policy management	Software licenses (optional HW)
SMP QuotaManager	Subscriber usage allowance/overage policy management	Software licenses (optional HW)
SMP ChargeSmart	Subscriber online/offline charging policy management	Software licenses (optional HW)
SMP Topology QoS Manager	Congestion-aware subscriber QoS policy management for mobile and cable networks	Software licenses (optional HW)
Service Delivery Framework: Platforms		
Service Gateway Tera	Highly scalable platform for Allot's service delivery framework	14-slot chassis, 500 Gbps, 2 Tbps/cluster 8 x 100GE ports, 96 x 10GE ports
Service Gateway 9500	Intel-based platform for Allot's service delivery framework	2U appliance, 140 Gbps, 1 Tbps/cluster, 24 x 10GE ports
Service Gateway Virtual Edition	Virtual platform for Allot service delivery framework	Software license
NetEnforcer	High-performance appliance platforms for Allot's service delivery framework	1U appliances, 20 Mbps to 16 Gbps, from 2 to 16 x 1GE /10GE ports
Service Delivery Framework: Management		
NetXplorer	Central policy management and configuration of Allot platforms and services	Software licenses (optional HW)
NetPolicy Provisioner	Self-management of multi-tenant services	Software license

About Allot Communications

Allot Communications (NASDAQ, TASE: ALLT) is a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience. Allot's flexible and highly scalable service delivery framework leverages the intelligence in data networks, enabling service providers to get closer to their customers, safeguard network assets and users, and accelerate time-to-revenue for value-added services. We employ innovative technology, proven know-how and a collaborative approach to provide the right solution for every network environment. Allot solutions are currently deployed at 5 of the top 10 global mobile operators and in thousands of CSP and enterprise networks worldwide.
