

Avast Business Managed Antivirus

Deliver award-winning antivirus to all devices and manage centrally

With Avast Business Managed Antivirus, businesses can deploy award-winning endpoint protection for devices, data, and people – anywhere on the network. Remotely install antivirus on devices across multiple offices and centrally manage them from an easy-to-read dashboard to ensure all devices are always up-to-date and malware free.

Powerful cyberprotection

Our hundreds of millions of users continually feed data into our immense cloud-based machine-learning engine, helping us quickly identify and destroy threats.

Complete visibility

Deploy, configure, and manage antivirus from a centralized dashboard for complete visibility across all managed devices, whether they are onsite or remote.

Comprehensive reporting

Stay on top of your security with in-depth analyses displayed in easy-to-read reports that include threats blocked, devices without antivirus, and devices with overdue virus scans.

Multi OS Support

Endpoint Protection supports MacOS devices and Windows computers and servers.

Product Features

Antivirus

Antivirus Pro

Antivirus Pro Plus

File Shield

Scans any file that is opened or downloaded to make sure it's malware-free.

●

●

●

Web Shield

Checks web URLs and certificates to ensure they're safe before a network connection is made.

●

●

●

Mail Shield

Inspects both incoming and outgoing emails to ensure they are completely malware-free.

●

●

●

Behavior Shield

Looks for suspicious behavior in programs installed on devices that may indicate malicious code.

●

●

●

CyberCapture

Detects and analyzes suspicious files in a safe, virtual environment.

●

●

●

Firewall

Monitors all network traffic between PC and the outside world to prevent unauthorized communication.

●

●

●

Anti-spam

Keeps dangerous phishing emails and annoying spam from cluttering and compromising inboxes.

●

●

●

SmartScan

Scans for malware, out-of-date patches, unsafe settings, and suspicious add-ons.

●

●

●

Sandbox

Lets users run applications, download files, and visit websites in a secure, virtual environment that is isolated from the rest of the computer.

●

●

●

Wi-Fi Inspector

Scans networks for vulnerabilities, checks network, device, and router settings, and identifies threats.

●

●

●

Real Site

Protects against DNS (Domain Name System) hijacking to ensure the correct website is displayed.

●

●

●

Rescue Disk

Boots up a PC that's been infected with malware from a USB that contains a clean version of the system.

●

●

●

Security Browser Extension*

Scans websites for reputation and authenticity, blocks ads, and puts devices in super-safe mode for additional privacy.

●

●

●

MANAGED ANTIVIRUS

Antivirus

Antivirus Pro

Antivirus Pro Plus

data

Data Shredder

Overwrites files multiple times to permanently erase sensitive data making it irretrievable.

●

●

●

Exchange Server Protection

Scans and filters emails at the Exchange server level – stopping potential attacks before they spread to the network.

●

●

●

SharePoint Server Protection

Checks all the files uploaded onto your shared storage to ensure no malware can compromise data.

●

●

●

identity

Passwords

Protects employees login details with a secure master password, and includes a browser add-on for secure auto-filling

●

●

●

SecureLine VPN

Encrypts your data and secures your connection when using public Wi-Fi connections, such as those in cafes or airports.

●

●

●

Browser Cleanup

Checks browsers for add-ons with poor reputation and removes cookies that contain personal information.

●

●

●

Webcam Shield*

Prevents applications and malware from accessing your PC's webcam without your consent.

●

●

●

Available in the following platforms:

Management Console

The Management Console is ideal for small businesses that need an easy-to-use, cloud-based platform to quickly deploy comprehensive protection to multiple endpoints, schedule regular scans, and quickly add more devices.

CloudCare

CloudCare is ideal for small to medium businesses and IT service providers that want a single, multi-tenant security platform to monitor threats, resolve issues, and deliver comprehensive endpoint and network security services.
